Specification (Modern Pharmacology)

| Sr. No. | Name of Item | Specification |
|---------|--|---|
| 1 | Videos- Interactive Computer Assisted Learning Modules | Computer Assisted Learning Modules / Experimental Pharmacology Interactive Computer Assisted Modules / Experimental Pharmacology Effects of Drugs on Rabbit Eye Effects of Drugs on Blood Pressure (BP) and Heart Rate (HR) of Dog 15 Hard Drive installation suitable for 15 computers (without computers) Experimental Pharmacology-Animated video demonstration modules 15 Exp 15 VCD Installation. Del electronic transfer. |
| 2 | Intravenous injection arm | The I.V. Injection Arm, made of standard material, is unique in quality and design and allows realistic training to teach competence to medical staff. It is also very suitable for group instruction because of its high quality, stain resistance and easy-to-clean soft material. It is ideal for practicing the following: 1. Correct puncture of peripheral veins for blood sampling. The following veins can be punctured: basilica vein, cephalic vein, median cubital vein, dorsal venous rete of hand. 2. Intravenous injections 3. Positioning of a butterfly catheter. |
| 3 | Intramuscular injection simulator Basic | The intramuscular injection simulator enables students to practice carrying out intramuscular injections cost-effectively. This fluid is injected into the muscle with a syringe. Carrying out intramuscular injections is one of the basic procedures in clinical training and must be carried out professionally by both doctors and medical personnel. Features: ●Made up of standard PVC material ●Provision for intramuscular injection ●Form - Buttock ●Realistic looks ●LIGHT weight and portable ●Durable and suitable for more than one lakh pricks. ●Facility to replace damaged parts. |
| 4 | Intradermal injections simulator | Features ●Made up of standard PVC material ●Provision for Intradermal injections for arm. ●Form - Arm ●Realistic looks ●LIGHT weight and portable ●Durable and suitable for more than one lakh pricks. ●Facility to replace damaged parts. |
| 5 | Subcutaneous/Intracardiac injection | Features ●Made up of standard PVC material ●Provision for subcutaneous injections. ●Provision for Intracardiac injections. ●Realistic looks ●LIGHT weight and portable ●Durable and suitable for more than one lakh pricks. ●Facility to replace damaged parts. |
| 6 | Pharmacology Mannequin (whole body) | Available Features Sublingual, Naso-gastric Passage, Intra Muscular Injection At Gluteous Maximums Muscles, Intra Muscular Injection for Deltoid Muscles, Intra Venous Sites in Fore Arm, Ribs and Intracardiac Injection Site, Provision for Enema, Provision for Long tube of Pvc For Removal of Fluid, At the Intravenous on Fore Arms, Naso-gastric Passage Connecting Esophagus & Stomach for Ryles Tube Introduction , Routes of Drug Administration, Veins on the Dorsum of Foot in both Male and Female- All Internal Visceral organ Present in Place: Heart, Lungs, Liver, Stomach, Kidney, Bladder Catheter Male, Bladder Catheter & Intravaginal Application. |
| 7 | Spacer Devices | Spacers are devices that hold the medication for a few seconds after it has been released from the MDI. They serve two main purposes: 1. Overcome the need for synchronization between firing the aerosol and inhalation. This allows full benefit of the pMDI 2. Slow down the aerosol spray before it reaches the mouth, thus allowing the propellants to evaporate and larger particles to settle in the spacer. This leads to less deposition in the or and greater deposition in the lungs. This may reduce any systemic side effect that may occur. |
| 8 | Rotahaler Devices | ---- |
| 9 | Asthalin Inhaler | Features ●Composition: Salbutamol ●Dose: 100 mcg ●Packaging Size :200 Metered Doses |
| 10 | Nasal spray (Budesonide) | Features ●Pack contains 150 metered doses of 7.5 ml ●Strength: 150 metered dose |
| 11 | Transdermal Patches (Nitroglycerine) | ---- |
| 12 | Insulin Pen (NovoRapid) | ●Packaging Size: BOX ●Composition: INSULIN ASPART I.P ●Form: FLEX PEN |
